MeVis Medical Solutions AG: Raising forecast for 2013 / Increase of resources in 2014

Bremen, November 4, 2013 – MeVis Medical Solutions AG [ISIN: DE000A0LBFE4], a leading provider of medical imaging software, again raises its forecast for the present fiscal year due to the current business developments.

- For 2013 consolidated revenues are now expected to increase compared to the previous year (previous forecast: stable consolidated revenues).
- For the EBIT (earnings before interest and taxes), a significant increase over the previous year is now expected (previous forecast: increase of the EBIT).
- Continued increase of Group liquidity for 2013 predicted.

At the same time, the Executive Board decided today that because of increased customer requirements for existing products a corresponding increase in resources is considered necessary. A forecast for the financial year 2014 will be published with the annual report in April 2014 at the latest.

The results of the third quarter 2013 will be published November 11th.

MeVis Medical Solutions AG was founded in 1997 and is one of the world's leading independent developer and provider of medical imaging software with focus on dedicated, disease-oriented clinical applications. MeVis AG has been listed on the Frankfurt Stock Exchange in the Prime Standard segment of the Regulated Market since November 16, 2007.

Over the past few years, there has been an enormous increase in the complexity and volume of medical imaging data derived from diagnostic imaging processes such as digital mammography, computed tomography (CT), magnetic resonance imaging (MRI), and ultrasound (US). MeVis' products analyze and process this data in such a way as to provide medical professionals with crucial information for early detection, diagnosis and intervention in the areas of cancer and lung diseases as well as neurological disorders. The Company develops its software solutions in close consultation with world's leading medical experts and original equipment manufacturers (OEM) in the medical technology sector and primarily markets this software via these partnerships.
