Join our live online seminars at "ECR 2021" – virtual showcase of Varex Imaging

Lung Diagnostic Software Support

- **Veolity – a tool for lung cancer screening**
  with Peter Bernholt, MeVis Medical Solutions AG

  This online seminar explains how to optimize your lung cancer screening reading workflow with MeVis' software package Veolity LungRead.

  THUR, Mar. 4, 2021   03:00 PM - 03:15 PM (CET)

  SAT, Mar. 6, 2021   03:00 PM - 03:15 PM (CET)

- **BTS guidelines for pulmonary nodules:**
  Save your reading time by an automated workflow
  with Daniel Drieling, MeVis Medical Solutions AG

  This online seminar explains the guidelines of the British Thoracic Society for the investigation and management of pulmonary nodules and how to optimize your lung cancer screening reading workflow with MeVis' software package Veolity LungRead.

  WED, Mar. 3, 2021   12:30 PM - 12:45 PM (CET)

  FRI, Mar. 5, 2021   12:30 PM - 12:45 PM (CET)

MeVis

DR and Fluoroscopy Acquisition Software

- **Nexus DR™ digital imaging system**
  with Jay Tracy, Varex Imaging Corporation

  The Varex Imaging Nexus DR software is an advanced digital imaging acquisition system designed to automate patient workflow. It is a cost-effective solution which includes advanced image processing algorithms for optimal image quality.

 WED, Mar. 3, 2021   04:00 PM - 04:15 PM (CET)

  FRI, Mar. 5, 2021   04:00 PM - 04:15 PM (CET)

- **Nexus DRF™ multi-purpose digital imaging system**
  with Jay Tracy, Varex Imaging Corporation

  Nexus DRF combines R&F and DR capabilities into one imaging platform. Nexus DRF supports digital fluoroscopy, digital radiography, and angiographic modalities as a full in-room system utilizing Varex Imaging's state-of-the-art flat panel detectors.

  THUR, Mar. 4, 2021   04:00 PM - 04:15 PM (CET)

  SAT, Mar. 6, 2021   04:00 PM - 04:15 PM (CET)

MeVis

Liver Surgery Planning Software Support

- **Liver surgery planning software support – MeVis Liver Suite:**
  Creating 3D visualizations to support living donor liver transplantation planning
  with Ragnar Bade, MeVis Medical Solutions AG

  MeVis Liver Suite is an image analysis software for the visualization of hepatic CT and MRI imaging studies. The software is designed to provide additional information supporting users in treatment planning, quantification of objects of interest, preoperative evaluation of surgery strategies, and post-procedure or therapy follow-up assessment for the hepatic system to include the related vascular structures (bile ducts, hepatic artery, hepatic vein, inferior vena cava) and related lesions (tumor, metastasis, suspect lesion, cyst, ablation area).

  WED, Mar. 3, 2021   04:15 PM - 04:30 PM (CET)

  THUR, Mar. 4, 2021   12:15 PM - 12:30 PM (CET)

- **MeVis Distant Services – 3D result viewer:**
  Interactive 3D visualizations of liver resection and living donor liver transplantation cases
  with Ragnar Bade, MeVis Medical Solutions AG

  This online seminar demonstrates the new MeVis Distant Services 3D result viewer intended for experienced MDS users.

  WED, Mar. 3, 2021   05:00 PM - 05:15 PM (CET)

  THUR, Mar. 4, 2021   01:00 PM - 01:15 PM (CET)

Investigational use only.
