Be prepared for lung screening: Meet the experts at RSNA 2014!

Early detection of lung cancer helps save lives. Screening programs for high-risk groups will be implemented in the U.S. in 2015. How are you going to meet the challenges of lung screening at your facility? You may be facing questions like these:

- How to implement screening workflows cost-efficiently?
- What are the practical implications of Lung-RADS™ structured reporting?
- How to achieve multidisciplinary training of the medical staff?
- What is the present and future situation of reimbursement?
- Does Computer Aided Detection help improve quality?

Take the opportunity to chat with renowned clinical experts from the field of lung cancer screening and diagnosis, and ask them about their practical experiences and recommendations in an informal setting.

Meet the experts at our **booth #2965-F** (South Building – hall A, German Pavilion):

Sun, Nov 30th, 1 pm	Mathias Prokop, MD Chairman of the Department of Radiology, Radboud University Nijmegen Medical Center, Netherlands
Sun, Nov 30th, 2 pm	Andrea McKee, MD Chair of Radiation Oncology, Lahey Hospital & Medical Center, Burlington, MA, USA
Mon, Dec 1st, 1 pm	Stephen Lam, MD, FRCPC, FCCP Chairman of the Lung Cancer Program at the BC Cancer Agency, Vancouver, BC, Canada
Mon, Dec 1st, 2 pm	Brady McKee, MD Head of Thoracic Imaging in the Department of Radiology, Lahey Hospital & Medical Center, Burlington, MA, USA
